

ANATOMY & BIOLOGY

Examples:

- ♥ Basic muscle groups and anatomy
- ♥ Biology in general
- ♥ Health checking
- ♥ Body evaluations
- ♥ De Coade Therapy
- ♥ Study of dissection
- ♥ Understanding Fascia
- ♥ Acupressure points
- ♥ Chakra points

Every horse owner at some point needs to learn at least something about these subjects. In my opinion the sooner the better since prevention is always better than cure.

In a certain sense horses are pretty tough animals yet on the other hand they are also incredibly fragile and especially in our world.

I believe this is because they are part of the food chain and injury, infection and disease can take over quickly therefore it only helps to know and understand more about how their bodies work.
